

# Ships Diver

Ship's Divers are tasked with a variety of work including security inspection of the vessel's hull and maintenance procedures. Self-contained breathing apparatus is often used in conjunction with a rope tether to assist in multi-diver 'necklace' searches. Modern rope-comms line enables divers to communicate verbally, whilst retaining rope-pull signals.

## NAVY KNIFE

ORDER CODE: TO127

## DIVEX TRILAMINATE SUIT

Flexible trilaminate suit with heavy duty zipper. Can be fitted with inlet and outlet suit inflation valves.

ORDER CODE: DS400-407

## BASCCA

A lightweight military standard SCUBA twinset incorporating impact-resistant swivelling manifold. Can be fitted with full face mask or demand valve.

ORDER CODE: SP100

## DEPTH GAUGE

Wrist depth gauge 0-80m. Easy to read with bright luminous face.

ORDER CODE: DD262006

## BUDDY DOUBLE GOLD

Diver's adjustable buoyancy jacket used by armed forces world-wide. Incorporates an emergency back-up breathing system and a lifting loop strong enough to lift fully kitted divers.

ORDER CODE: DD170003  
NSN: 4220-99-770-9717

## COMPASS

Easy to read with bright luminous face.

ORDER CODE: DD261014

## DIVERPHONE

Two diver radio for use with Divex Rope Comms-Line. Features headset and record facilities.

ORDER CODE: CO057-8

## 75M ROPE - COMMS CABLE DRUM ASSEMBLY

Cleverly designed rope communications cable for diver to surface contact. Incorporates 4 wires woven within the rope structure.

ORDER CODE: CO020754

## JETFINS

ORDER CODE: MF011  
NSN: 4220-99-310-9008  
(Size XL)

## THE DIVEX BASCCA COMMS KIT

This specially designed communications interface provides efficient and reliable two-way wire communications between surface and diver or diver to diver via the surface.

ORDER CODE: CO100

## FLEXBRUSH

A hydraulically powered rotary brush cleaning system for use in marine growth removal on ship's hulls & underwater structures. Its unique articulated design permits use on curved structures.

ORDER CODE: TO4000
